PROFILE

I am an ambitious BSc. Telecommunication graduate with a deep passion for AI and software development. I am a self-driven learner building front-end applications using React, FastAPI, Python, and JavaScript. I am experienced in AI data annotation (Remotasks) and freelance AI/data tasks. I have proven ability to build, experiment, and ship independently, with a strong drive to contribute to real-world AI projects.

TECHNICAL SKILLS

- AI Data Annotation
- Data Analysis
- Generative AI / LLMs
- Git / GitHub
- HTML / CSS
- Google Workspace
- Python
- JavaScript
- React
- FastAPI
- Problem Solving

KEY PROJECTS & PORTFOLIO

Frontend Web Application

JavaScript, React and REST Integration

- Developed interactive single-page applications using React with component-based architecture and state management.
- Integrated third-party REST APIs and implemented dynamic data rendering and user authentication flows.

Automation & Data Scripts

Python and Excel Automation

- Created Python scripts to automate data extraction, cleaning, and processing tasks, reducing manual workload significantly.
- Worked on data pipelines involving structured and unstructured datasets as part of freelance and internship engagements.

WORK EXPERIENCE

AI Data Annotator (Freelance) - Remotasks

2023 – Present

- Completed AI/ML data annotation tasks including text classification, chatbot response rating, and RLHF (Reinforcement Learning from Human Feedback) labelling.
- Evaluated and ranked AI-generated content for quality, accuracy, and safety — directly improving LLM model outputs.
- Consistently met quality benchmarks with high accuracy scores on complex annotation projects.

Front Office Assistant Attachment- Homebase Gardens Hotel and Safaris

Jan 2024 – Aug 2025

- Managed front office operations, guest communications, and daily reporting using digital tools and PMS systems.
- Processed financial transactions, maintained documentation accuracy, and coordinated cross-departmental workflows.
- Applied strong problem-solving and communication skills in a fast-paced customer-facing environment.

Customer Service Representative / Data Intern - Generation Kenya

Jan 2023 – Dec 2023

- Performed data entry, data cleaning, and quality assurance across multiple datasets to support decision-making.
- Assisted in onboarding, student records management, and basic data analysis and reporting tasks.
- Worked on freelance digital and AI data tasks on platforms including Upwork, gaining exposure to real-world AI workflows.

EDUCATION

BSc. Telecommunication & Information Engineering | Kabarak University

2018 – 2025

- Gained foundational knowledge in networking, software systems, and engineering principles.
- Applied programming and systems thinking skills to academic projects and self-initiated technical work.

Kenya Certificate of Secondary Education (B Plain) | Vihiga Boys High School

2013 – 2017

ADDITIONAL TRAINING & CERTIFICATIONS

Freelance Admin-Support & Digital Skills Training – Generation Kenya (2023)

- Python programming (self-directed), JavaScript, React, FastAPI — developed via online platforms and personal projects.
- Google Workspace, Microsoft Office, data analysis methods, and research methodologies.
